DETAILED ACTION

Over the past year, the initial restriction and addition of new claims which fall in various species groups has clouded the clarity of the restriction. Therefore, this restriction requirement should clarify the invention claimed and the various species associated with the instant invention.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 are, drawn to tapered sports equipment handles, classified in class 473, subclass 513.
- II. Claims 10-18, and 24-27 are drawn to sports equipment handles with elongate longitudinal cushioning ribs, classified in class 473, subclass 513.
- III. Claims 19-23 are, drawn to sports equipment handles with elongate longitudinal grooves, classified in class 473, subclass 513.

Claims 28-31 link(s) inventions II and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 28-31. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending

from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP Section 804.01.

Inventions I - III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utility such as a sports handle without a taper. And inventions I and II have separate utility as a sport shaft without grooves. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The following species restriction is further made, once an inventive group is selected.

Group I- Lacrosse sticks as shown in Fig 2 and 3, 15.

Group II- Lacrosse sticks as shown in Fig 4 and 5.

Group III- Lacrosse sticks as shown in Fig 6 and 7.

Group IV- Lacrosse sticks as shown in Fig 8.

Group V- Lacrosse sticks as shown in Fig 9.

Group VI- Lacrosse sticks as shown in Fig 10.

Group VII- Lacrosse sticks as shown in Fig 11 and 12.

Group VIII- Lacrosse sticks as shown in Fig 13 and 14.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the independent claim in the elected group appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Michael A. Hierl on February 6, 2006 to request an election to the above restriction requirement with a voice mail message to respond if the applicant wished to discuss the restriction. At the time of this action, applicant's representative has not returned the examiner's phone message which resulted in this action being mailed.
